From the University of Minnesota student paper, Minnesota Daily, November 15, 1963.

**Classicist Will Lecture  
On Hieroglyphics Here**

The difficulties in the current decipherment of ancient Cretan hieroglyphics will be discussed by Prof. Douglas Young of St. Andrew's University, Scotland, today at 3:30 in the Union men's lounge.

The "Minoan Linear B" signs were first deciphered by historians Michael Ventris and John Chadwick 10 years ago. Young contends that their solution might not be correct.

The lecture is sponsored by the Student Classics Club

Classics Club & Student-Faculty Committee  
present first in new series of lectures, discussions

# IS LINEAR B DECIPHERED ?

Visiting Prof. from Scotland,  
**PROF. DOUGLAS YOUNG**  
Will Speak

## IS 'LINEAR B' OF MINOAN ORIGIN?

The entire community of classics scholars in the Twin Cities area is up in arms about "certain answers" to this question. The showdown may come this afternoon. You won't want to miss the debate on one of the key archaeological breakthroughs of the Twentieth Century.

**3:30 MEN'S LOUNGE — CMU — TODAY**

The New York Times for November 23 prints a report of discoveries by C. F. A. Schaeffer of a bronze statue contemporary with the end of the Mycenaean period in Cyprus. The statue came from a sanctuary, which itself dates from the beginning of the Iron Age, within the walls of Engomi.

CORRESPONDENCE

To the Editor:- Karer auf Kreta.

Es ist kaum zu zweifeln, dass im späten 2. Jt. einige hethitisch-luwischen Stämme —darunter die Karer— nicht nur in Kleinasien, sondern auch auf Kreta und sonstigen Inseln siedelten: vgl. ON kretisch "vorgriech." Πρίωνος (und "vorionisch" Πρίωνη < \*Πριῶνα ~ westanat. Pariyana: vgl. G. Huxley, "Crete and the Luwians," Oxford 1961, S. 29) ~ kar. Σ(α)ρῶσος (\*-ns -Bildungen von hethitisch-luwischen Adverbien pariya- [prija] und sara-) usw. Vielleicht aber siedelten diese Stämme im Westen nur in wenigen Orten, zumeist ziemlich spät, weswegen die bekannte Theorie des einheitlichen, weitverbreiteten hethitisch-luwischen Substrats in den Sprachen des Mittelmeergebiets möglicherweise etwas zu modifizieren ist.

Auch im 1. Jt. ist Kreta von Karern besucht worden, die dort etwa im 8. Jh. ihre Schrift den Griechen entnommen haben. Die Hypothese einer solchen Entlehnung scheint durch folgende Tatsachen bestätigt zu sein (das griechische Material ist L. Jeffery's Monographie "The local scripts of archaic Greece," Oxford 1961, entnommen):

Die Griechen von Kreta und die Karer gebrauchten das | -Zeichen für Worttrennung (wie auch •, : , ; ; Σ gebrauchten die Karer für χ), für i wurde auf Kreta das Zeichen S verwendet, das später in karischer Schrift zu Ϛ (Wadi-Halfa) und ϙ wurde (unter "graphischen Einwirkung" von Koppa; vgl. die Sigma-Iota-Entwicklung in griechischen Alphabeten etc.), aber auch zu ϙ (Sudostkarier: hier erhielt das i-Zeichen--

vgl. phönik.  $\text{?}\eta\text{i}$  --ein Merkmal<sup>~</sup>, wodurch man es von  $\text{P}_r$  unterscheiden konnte). Das alte Koppa  $\text{P}\bar{\text{P}}$  bezeichnete aber im Karischen einen "L-Laut". Das griechische Alphabet von Melos, das dem kretischen sehr nahe stand (wie auch die Alphabete von Thera, Sikinos u. a.), besass das Beta-Zeichen  $\text{V}$ , welches auch in älteren kar. Inschriften in der Bedeutung von  $\text{b}$  auftrat: vgl. kar. PN bskove- < heth. Paskuwa (kar.  $\text{d}$  ist aber  $\text{r}$ , nicht  $\text{b}$ !). Der Buchstabe  $\text{J}$  (Sikinos) erscheint in einer der kar. Inschriften Lydiens (vgl. G. Hanfmann, BASOR 166, 1962, S. II); dasselbe Zeichen kommt in der Bedeutung von  $\text{z}$  in den einheimischen Inschriften von Phrygien und Lemnos).  $\text{P}\oplus\text{V}$  erscheinen als /p/ /t/ /k/ ( $[\text{p}^{\text{h}}][\text{t}^{\text{h}}][\text{k}^{\text{h}}]$ ) nur in spätkarischen Inschriften (vgl. Spätetruskisch); im 7-5. Jh. - aber auch später - gebrauchten die Karer für  $\text{p}$  ein  $\text{V}$  (wie auch  $\text{V}\text{V}\text{V}$ ): das  $\text{P}$ -Zeichen fehlte ja auf Kreta. Sporadisch gebrauchten die Karer auch die kretische Form  $\text{P}$  (Pi). Derselben Quelle ist das karische s-Zeichen  $\text{M}$  entnommen. Die kar. Inschriften von "Silsilis" enthalten auch die älteren s-Formen  $\text{W}\text{W}$ . (Es sei bemerkt, das F53, wo msna $\lambda$  - \* Massanalli - vgl. F58, F69, F70, L9a, B7 - in der Form  $\text{V}\text{W}\text{W}\text{A}\text{O}$  vorkommt, linksläufig ist.) Kar.  $\text{V}(\geq)\text{V}$  sei dem kret. Kappa verwandt. Die griechischen Sampi-Zeichen  $\text{T}\uparrow\text{T}$  sind aus dem Karischen entlehnt (vgl. kar.  $\text{T}$  phönik.  $\text{t}$ ; kar.  $\uparrow\tau$ ;  $\text{T} < \text{T}$ , unter Einwirkung von Tau?), wie auch manche anderen griech., lyd., lyk., etrusk. etc. Buchstaben.
